RAS RESEARCH FELLOWSHIPS – Terms and Conditions
APPLICATIONS FOR RAS RESEARCH FELLOWSHIP
TENABLE FROM OCTOBER 2022

1. **Purpose**
The RAS Research Fellowship is awarded to enable outstanding early career scientists to pursue research in the UK in the disciplines advanced by the Royal Astronomical Society (RAS), i.e. astronomy, solar-system science, geophysics and closely related branches of these sciences. The research topic must be acceptable to the selection panel set up by the Council of the RAS (the Trustees of the Society).

2. **Eligibility**
Applicants must either:
- have a recognized PhD degree (or equivalent) obtained after 1 October 2017 or
- have successfully taken the ‘viva’ examination by the application deadline (23:59 (BST), Friday, 15 October 2021) and expect to be awarded a PhD degree by the Fellowship Start Date.

Selection will be based on capability, achievement and promise as well as the proposed research.

Applicants may be of any nationality however employment will be through the host institution (host institutions can include universities and other not for profit research active institutions). In this respect, the applicant is asked to indicate their residency status with respect to the UK in order that, if necessary, it can be confirmed that they will be able to work at the institution concerned. The fellowship will not be awarded to an applicant if they are unable, for any reason, to commence at the host institution within six months of the Fellowship Start Date.

Institutions may support multiple fellowship applications, but only ONE RAS Research Fellowship may be held in the same institution at any one time (see supporting notes for details of current Fellows). The Norman Lockyer fellowship is classified as an RAS fellowship for this purpose.

3. **Period of award and Starting Date**
The RAS Research Fellowship will be awarded for a period of three years, (or as modified by 5 and 6 below), beginning on the Fellowship Start Date (or within 6 months thereafter).
The three year term can only be extended by 5 and 6 below. Notwithstanding that the fellowship will terminate no later than 6 (six) years after the Fellowship Start Date, after which all payments by the RAS in respect of the fellowship will cease.

4. **Value of award and payment**
The RAS will fund Fellows on the UCU single pay spine from points 30 to 36 inclusive. If the host institution, as employer, wishes to pay at spine points above 36, that extra expenditure must be found from their own funds. The final salary level will be confirmed by consultation between the host institution and the RAS (“the “Nominal Salary”). A further £2,000 per annum may be claimed for costs incurred in attending meetings and conferences or for other items related to the research. In addition, the RAS will only accept claims for Employers National Insurance at normal rates and the employer pension contribution at the prevailing USS rate. If the host institution wishes to pay above this, the extra expenditure must be found from their own funds.

5. **Breaks of Service**
The Society will support breaks in service that the host institution as the employer is legally obligated to allow and will consider supporting breaks in service for other reasons in exceptional circumstances only. If approved the Society will provide the Fellow with the Agreed Salary until such a time as the Society has expended the equivalent of 3 years Full Time Equivalent annual salary, as per this original agreement.

6. **Flexible Working**
The Society will consider requests for flexible working arrangements; the request must be supported by a written agreement and confirmation that that this will not adversely impact on the delivery of the research undertaken as part of the Fellowship from the line manager and department head at the host institution.

If flexible working arrangements are approved the Society will provide the Fellow with the Agreed Salary until such a time as the Society has expended the equivalent of 3 years Full Time Equivalent annual Nominal Salary, as per this original agreement.

7. **Application process**
Please ensure that the supporting notes are read in advance of making an application. The online application form must be filled in by the candidate, and then certified by the Department Head and countersigned by the Administrative Officer in the institution at which it is proposed to hold the Fellowship. This is to confirm the acceptance of the host institution that the RAS will fund only directly incurred costs, and not overheads (including bench fees or ‘Full Economic Costs’).

**Online applications should be completed online by 23:59 (BST), 15 October 2021. It is planned to make offers by mid-February 2022.**

Philip Diamond,
RAS Executive Director
August 2021
Supporting notes and defined terms for RAS Research Fellowship

Defined Terms

**Fellowship Start Date:** 1 October 2022

**Agreed Salary:** The Nominal Salary adjusted to allow for flexible working and career breaks as allowed in Clauses 5 and 6

**Nominal Salary:** The annual salary rate set in Clause 4.

Notes

**Residency status**
Applicants may be of any nationality however employment will be through the host institution. In this respect, you are asked to indicate your residency status with respect to the UK in order that, if necessary, it can be confirmed that you will be able to work at the institution concerned. The fellowship will not be awarded to you if you are unable, for any reason, to commence at the host institution within six months of the Fellowship Start Date.

**Administration**
The Society intends to ask your department to administer your post, which will mean that the following deductions will be made at source:
- Income Tax
- Personal contribution to National Insurance
- Where appropriate, personal contribution to USS

**Restrictions**
For the duration of your Fellowship any teaching or demonstrating you undertake must be limited to a maximum of 6 hours a week. No other type of paid work may be undertaken without the consent of the Society. You must advise the Society of any absence from your institution other than for conferences, fieldwork or permitted holidays.

**Holidays**
Annual leave may be taken at the discretion of your Head of Department and in line with the normal practice of your institution, but should not exceed 30 days per year.

**Absence**
Payment for absence through illness or other causes will be subject to the Host Institution’s conditions of employment. The Society will compensate the host institution
at the level equivalent to statutory payments; if the host institution, as employer, wishes to make payments above this level the extra expenditure must be found from their own funds. The Society accepts no liability for any illness, injury or accident which occurs during the period of your Fellowship. RAS Research Fellows are not employees of the Society and are not covered by the Society’s employee liability policy.

**Reports**

Fellows are expected to publish original research results, normally in the journals of the RAS. Any publications arising from the Fellowships must acknowledge the RAS. Continued funding in years two and three is contingent on submission of satisfactory interim reports (1500-2000 words in length) at the end of year one and year two of the Fellowship. These should provide a factual summary of the work carried out to date, including results, and should outline research planned for the remainder of the award. A short final report, including a list of any publications and manuscripts in press or under review, should be submitted no later than 3 months before the termination of the award. Fellows are encouraged to speak at RAS Ordinary meetings and write articles for the RAS publication A&G.

**Termination of Award**

A Fellowship may be terminated where the progress or conduct of the Fellow is judged to be unsatisfactory by the Council of the RAS. If a Fellow discontinues their research or takes up other employment before the end of the award, the RAS must be informed immediately.

**Host Institutions**

Host institutions can include universities and other not for profit research active institutions.

**Institution Moves**

Fellows will not be allowed to move between organisations except under exceptional circumstances.

**Extension**

There will be no extensions to the Fellowships, other than as allowed by Clauses 5 and 6.

**Current and Past RAS Fellows**

Fellows are encouraged to establish and maintain contact with each other and the RAS.
